## PRODUCT DETAILS

### Two chamber system

Two same size cylinders are filled and emptied in alternating cycles. This enables non stop vacuuming.

### Hand regulator

For adjusting the suction power, for example in shallow water.

### Aluminium suction tubes

Everything under control thanks to torsion-resistant aluminium suction tube. So you can exert more pressure, especially when using the brush nozzles.

### Handle, transport rollers + suction tube receptacle

Fast and convenient transport to the pond site via the adjustable and ergonomic handle.

### Debris collection bag

Ideal for returning cleaned water when suctioning larger particles > 1 mm (not suitable for pond silt).
