PROFILUX E 101 AND LUNAQUA 10 HALOGEN

Thanks to the compact design the Profi-Lux E 101 to accentuate public areas with focused light effects and allow sculptures, water features, individual fountains, or plants, to radiate in light.

The housing of the halogen spotlight is made of robust stainless steel and is fitted with a PG 13.5 cable gland, as well as with a pivoting spotlight holder – also made of stainless steel.

Product characteristics at a glance
- High-quality stainless steel spotlights
- Stainless steel bracket for simple and safe installation
- Halogen bulbs: 50 W, 75 W and 100 W
- With PG 13.5 cable entry

The spotlight, made of impact-resistant plastic, is connected to the 12-Volt safety transformer via special connections that can also be used underwater. This means that even greater distances to the 230 Volt outlet can be bridged with conventional cable. The transformer is equipped with 4 couplings to connect either 4 x 35 W, 3 x 50 W or 2 x 75 W, 12 V. The special structured glass cover, in conjunction with the aluminium reflector, creates optimal light efficiency. The mounting bracket enables a pivot range of approximately 180°.

### Product characteristics at a glance
- Accentuates with rich light effects
- Can be implemented underwater and above the water surface (excl. 75 W lamp)
- Housing made of impact-resistant plastic
- Structured special glass cover for optimal light efficiency
- Mounting bracket with 180° pivot range
