SPA 22 - SPA 280													

* Pool-, seawater product version on request

SPA 22 - SPA 280

These multistage structured submersible motor-driven pumps are the powerful heart for high delivery heads.

These pumps can supply single fountains as well as group fountains with sufficient water volumes and pressure for larger spray heights. Thus they are preferred in installations in which the delivery head of single-stage pumps are no longer required.

*Contact OASE before ordering a Pool or a Sea Water SPA pump. Technical specifications of this model (58903) may vary.

Product characteristics at a glance

- Extremely shallow and slender design
- Multistage submersible motor pump
- Suitable for higher delivery heights
- High-volume filter basket
- Good stability
- Robust wet-running canned motor
- All parts made of stainless steel
